DATE: Bidding
Closes Tuesday,
February 24th at
10:00 A.M. PT

SYSTEM HIGHLIGHTS:

- (10) LAMBDA Hyperplane 8x SXM4 A100 Servers
- (18) WEKA 522 TB Distributed Storage Clusters
- SONICWALL NSA 4700 Firewalls
- MELLANOX QM8790 40 Port Quantum HDR Switches
- Complete Cluster Sold, Configured, Installed, & Serviced by LAMBDA Data Systems
- Hardware Un-Racked, Securely Crated, Palletized, & Ready to Ship by LAMBDA Data Systems

Complete hardware listing with serial numbers and specifications available.

AI research/production cluster with 80x A100-80GB GPUs across 10 nodes, each with a massive 4TB of RAM and 120TB of local NVMe per node, coupled with 522TB Weka storage (18 nodes), and all connected with InfiniBand networking. From the ground up, this cluster is optimized for maximum throughput between GPUs across the cluster as well as local and Weka storage, connected with InfiniBand networking for any AI workload.
